

Company Overview:

Infinity Technologies provides IT support and consulting services to area businesses in central and northern Virginia. Our areas of focus include new commercial construction projects, phone systems, and managed support services. A typical client will have a staff of 10-60 users and the need for help with managing their growing technology infrastructure.

Commercial Construction Projects - Services Provided:

Project Scope Planning – an assessment consultation helps to define the overall project scope and assists with initial budget planning

Project Design – working with the owner and architect helps to ensure that the proper considerations for the technology infrastructure are taken into account

Installation and Implementation – from wiring and network terminations to server and phone system deployment and activation

Project Management – leveraging significant construction job site experience ensures that our team regularly coordinates with the General Contractor to execute the project plan on time

Phone Systems – Voice over IP - Highlight Projects:

S.A. Medical Inc. – Mr. Dana Tate – Call Center and supporting offices with 48 phones; unique features include: queuing inbound calls depending on volume to customer service workgroup teams; supervisor ability silent listen or break in to calls; wireless headset use for reception and management

Liberty Equipment – Mr. Tom Ball – Multi-site location with 28 phones; review and optimization of existing phone service combined with advanced call routing features of the new system saved Liberty \$1000 per month in telecom expenses

Mid-Atlantic Foam – Mr. Rick Russell – Nationwide mobile sales team and manufacturing facility with 20 phones; sales reps are free to be on customer visits away from their desks thanks to mobility features like Visual Voicemail (voicemails sent as audio attachments to their email address) and Find Me Follow Me (calls to their extension are routed by the system to the rep's cell, home phone or even a backup rep in the office)

Managed Support Services - Service Highlights (starting at \$199 per month):

- Ensures you have a qualified team, familiar with the site and ready to respond 24x7 proactive monitoring and alerting identifies, tracks and reports on issues effecting the security, performance and reliability of your IT
- Real-time asset inventory and regular health, security, and performance analysis
- Continuous monitoring for viruses, worms, spam ware, and other malware
- Up-to-date security patches for your desktops and servers
- Quarterly Business Review provides a comprehensive analysis of our findings as well as demonstrates areas of cost savings, increased performance, and over all health assessment

ThinkPad R61 and T61 Notebook and X61 Tablet

From the Worlds Best Engineers come the Worlds Best Engineered PC's

ThinkPad R61 – Performance and Value for Mainstream

ThinkPad® R Series are affordable and lightweight notebooks with great performance, outstanding battery life and large, bright displays. The new ThinkPad R61 is the coolest and quietest R Series notebook ever, with a 14.1" widescreen model that's thinner and lighter for enhanced mobility. R Series models offer Intel® Centrino® Duo Mobile Technology and Intel® Core™2 Duo processors, and they're now available in special configurations ideal for small business.

ThinkPad T61 – Perfect Balance of Performance and Mobility

ThinkPad® T Series notebooks combine today's most advanced features with the legendary ThinkPad design. You can get it all with T Series — Intel® Centrino® Pro processor technology, Genuine Windows Vista® or XP Pro®, advanced NVIDIA graphics, and easy mobility, including Wireless WAN capability. The new ThinkPad T61 is the most secure, strongest, coolest and quietest T Series ever and comes in a variety of standard and widescreen displays.

ThinkPad X61 – A Convertible notebook without compromise

The ThinkPad® X Series Tablet offers full X Series functionality plus a unique swivel hinge that lets the screen flip and rotate 180° to create a Tablet PC ideal for taking notes, form-entry or collaboration. New ThinkPad X61 Tablet models are available with Intel® Centrino® Pro processor technology and Genuine Windows Vista®. And like all X Series notebooks, they're ultraportable with extremely long battery life and available Wireless WAN.

About Infinity Technologies

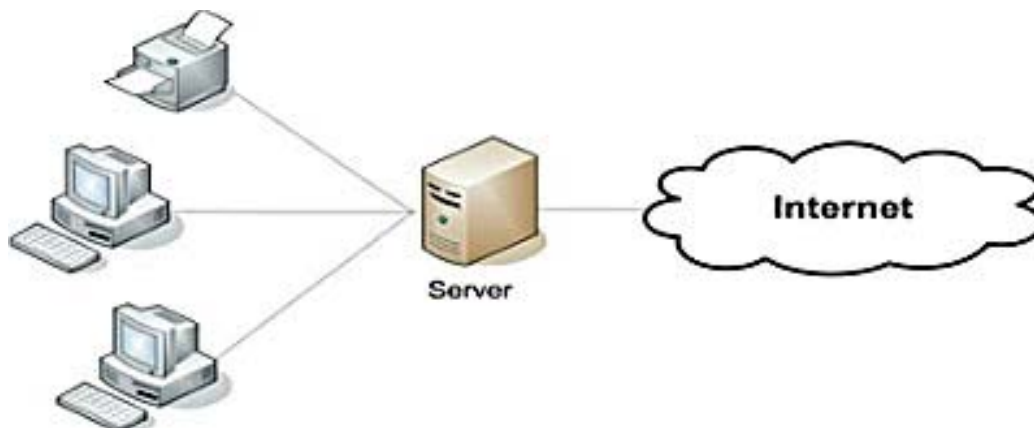

Infinity Technologies is a full-service technology solutions provider and consulting firm that caters to the needs of small to medium sized businesses in central and northern Virginia as well as the national capital region. We offer end-to-end solutions to assist businesses in improving the overall efficiency and profitability of their operations. From Needs Assessment and Workflow Design to Hardware Implementation and Post-Sale support, we provide small businesses with a single-source IT resource for every aspect of their business.

What is a Server?

What is a server, and why would your small business need one?

At the most basic level, a server is a technology solution that “serves” files, data, print, fax resources, and more to multiple computers. Advanced server solutions, such as **Windows Small Business Server 2003 R2**, also enable you to manage user accounts and passwords, grant or restrict access to shared resources, automatically back up your data, and access business information remotely.

The word “server” often refers to the specialized computer (or hardware) that the server software runs on. The server is optimized to perform services for other computers or “clients.” Clients can be computers as well as printers, faxes, or other devices that connect to the server.

Together, a server and its clients compose a client/server network. A client/server network provides routing systems and centralized access to information and resources, stored data, and more.

What can your business do with a server?

With a server, you can share files and resources, such as fax machines and printers, in a more secure manner. For example, with a server network, employees can access the Internet or company e-mail at the same time.

Microsoft offers an award-winning server solution designed specifically for small businesses (up to 75 users): Windows Small Business Server 2003 R2. What's unique about **Windows Small Business Server 2003 R2** is that it provides small businesses with many server features previously available only to large companies, all in one affordable, integrated solution. These server features include e-mail, Internet connections, business intranets (internal Web sites), remote connectivity, support for Windows Mobile-based devices, file and print sharing, and data backup and restore capabilities.

Need an IT Expert to install your new **Microsoft Small Business Server 2003 R2**?

Infinity Technologies is a Microsoft Gold Certified Partner and Microsoft Small Business Specialist. Infinity Technologies has over 12 years of experience installing and supporting Microsoft based servers and networks. Call Today for a free consultation to evaluate how **Microsoft Small Business Server 2003 R2** can help your business.

PBX Phone Systems for Small and Multi-Location Businesses

TalkSwitch is the original all-in-one PBX telephone system for small business. Packed with amazing features, TalkSwitch systems improve your image, save you money and keep you connected everywhere. With TalkSwitch, you connect the way you choose. Our systems work with VoIP (Voice over IP) and the traditional telephone network, and you can choose IP or standard analog telephones. TalkSwitch PBX and IP PBX phone systems let you work the way you want to.

Why TalkSwitch?

6 Reasons to Love TalkSwitch Telephone Systems

1 - UNBEATABLE VALUE

Great systems, small prices - compare the cost of TalkSwitch to other systems on the market and you'll see. Complete phone systems from US\$695. VoIP phone systems from US\$995. But it's more than just our low prices. TalkSwitch also saves you money.

2 - RICH FEATURES

Voicemail, auto attendants, dial-by-name directory, call routing. And much more. TalkSwitch comes complete with the kind of sophisticated features that users of big business PBX phone systems take for granted.

3 - OPTIONAL VoIP

Need Voice over IP? Multi-location integration? No problem; small business VoIP is here. VoIP-enabled TalkSwitch models handle both VoIP and the traditional telephone network. It's the best of both worlds in one easy-to-use phone system.

4 - REMOTE EXTENSIONS

Your work doesn't stop at the walls of your office. Neither does TalkSwitch. You can add your cell phones or any other telephones, anywhere, as remote extensions of your system. TalkSwitch uniquely connects your mobile and teleworkers.

5 - EASY SET-UP

Unlike other telephone systems, TalkSwitch is easy to install, saving you time and money; you can even do it yourself. And with its easily configured settings, moving employees or changing the way your phone system handles calls is a snap.

6 - FLEXIBLE GROWTH

TalkSwitch has a modular architecture that lets you grow when you need to and add VoIP when you want to. Designed to maintain your investment as you grow, TalkSwitch covers from 1-64 users per location.

ShoreTel Small Business Edition – An Affordable, enterprise-class phone system designed for small business
 ShoreTel has supplied thousands of enterprises with reliable, easy-to-use phone systems since 1998, delivering increased productivity and industry-leading customer satisfaction. Small Business Edition (SBE) makes the power of the ShoreTel phone system available to smaller enterprises at an affordable cost.

Key Benefits

ShoreTel Small Business Edition (SBE) provides you with the benefits and functionality that ShoreTel systems are famous for, including:

Ease of Use - The award-winning interface provides you with dial-by-name simplicity and easy access to features like conference, transfer, and hold.

Best-in-Class Management - A single, intuitive interface enables your system to be managed from anywhere on the network, giving you increased control and decreased expense.

Distributed Reliability - ShoreTel phone systems are built on a distributed architecture that ensures 99.999% reliability with no single point of failure.

Seamless Scalability - ShoreTel SBE grows with your business and preserves your investment. If your needs expand beyond ShoreTel SBE, a simple software upgrade enables all of ShoreTel's features across all your sites - no hardware change required.

Designed with Small Business in Mind - ShoreTel SBE can be scaled to a size that meets the need of your business, with up to 50 users at one location, providing a cost-effective solution that will dramatically improve communications and productivity within your organization. As a small business owner, you may not have the luxury of dedicated IT staff. ShoreTel's ease-of-use and management make it the perfect fit for your company. You can perform many of the most basic functions yourself, like adding phones, changing extensions or moving users - without having to waste time and money on a service provider.

Phones that Look Beautiful Too - ShoreTel phones are ergonomically designed for both comfort and visual impact. Their leading-edge designs are available in a wide variety of configurations and are offered in black or silver. ShoreTel IP telephones provide high fidelity audio capable of delivering seven octaves of the human voice. Built-in functionality includes speakerphone, Caller ID, and message waiting, as well as services such as transfer, conference, pick-up, park, and intercom. A ShoreTel phone will not only boost office productivity, it will enhance your business image as well.

ShoreTel Small Business Edition includes:

- 1 ShoreGear voice switch (SG-40 or SG-60 or SG-120)
- 10 Extension and mailbox licenses
- 10 Personal Call Manager licenses
- 1 Operator Call Manager license
- 1 Extension-only license for FAX
- Optional pre-configured server for management and advanced applications

Simply add desired number of phones, additional licenses, and Infinity Technologies Professional Services to complete your system.

ShoreTel Ranked #1 in Customer Satisfaction for the last four years

Call today for a free VoIP Analysis of your business including carrier services to reduce overall phone and internet expenses.

Infinity Technologies has Medical Experience:

Infinity Technologies has been supporting local physician offices for over 12 years. During this time we have helped install and maintain networks designed from the ground up to fit Medical practices unique needs and challenges. We can help with new office build-outs to make sure we have the correct infrastructure in place from day one when you move into your new office. We have experience in the following software designed for the medical industry: Appointments PRO, Medinotes E, E-Clinicalworks, Visionary, Dentrix, Orthoware, Allmeds, Kodak Imaging Systems, Plus many others. Below are just a select few examples of hardware and software we have installed and support for multiple medical offices.

Software Solutions for Medical Offices:

AppointmentsPRO 10

AppointmentsPRO is as easy to use as an appointment book -- but it does so much more! Basic scheduling tasks are a breeze: make or change an appointment instantly...check in patients when they arrive and have been seen...or look up any appointment in the past or future. You can also schedule complex, recurring visits in seconds with the "Find Appointment" feature; or schedule groups while tracking the authorized visits and case data for each person in the group separately. More than a scheduler, AppointmentsPRO improves workflow office-wide. Gain new insights into your practice with more than 90 different reports on payments, outcomes, no-shows, resource usage, authorized visits, referrals and more. You will also improve office communication with instant alerts that inform practitioners when their scheduled patients have arrived or canceled an appointment...and a Workflow Manager that lets you assign tasks to staff members and track their completion. Paperless functions like one-touch scanning of documents and virtual folders let you save PDFs, DOCs, JPGs, etc. to the patient's case without all the filing and paperwork.

Medinotes – Electronic Medical Records

MediNotes e was designed with the small practice physician in mind. By focusing on the ambulatory market, MediNotes Corporation is committed to providing a quality EHR at an affordable price. Installed in over 4,600 clinics nationwide, MediNotes e version 5.0 is the only CCHIT Certified product for Ambulatory EHR 2006 that has a significant portion of its client base in specialties outside of General Medicine including: Cardiology, Chiropractic, Dermatology, Family Medicine, Internal Medicine, Neurology, OB-GYN, Ophthalmology, Optometry, Orthopedics, Otolaryngology, Pediatrics, Podiatry, Primary Care, Rheumatology, Surgery and Urology.

- The EMR of choice for small group practices
- One of the very first EMR providers in the nation
- Industry leading support and customer service
- Easy-to-use and easy to individualize
- One of the most affordable solutions on the market today
- Start to finish implementation assistance

With 9 out of 10 new clients experiencing success with the program, MediNotes e will ensure you **Get it Right the First Time.**
