

PBX Phone Systems for Small and Multi-Location Businesses

TalkSwitch is the original all-in-one PBX telephone system for small business. Packed with amazing features, TalkSwitch systems improve your image, save you money and keep you connected everywhere. With TalkSwitch, you connect the way you choose. Our systems work with VoIP (Voice over IP) and the traditional telephone network, and you can choose IP or standard analog telephones. TalkSwitch PBX and IP PBX phone systems let you work the way you want to.

Why TalkSwitch?

6 Reasons to Love TalkSwitch Telephone Systems

1 - UNBEATABLE VALUE

Great systems, small prices - compare the cost of TalkSwitch to other systems on the market and you'll see. Complete phone systems from US\$695. VoIP phone systems from US\$995. But it's more than just our low prices. TalkSwitch also saves you money.

2 - RICH FEATURES

Voicemail, auto attendants, dial-by-name directory, call routing. And much more. TalkSwitch comes complete with the kind of sophisticated features that users of big business PBX phone systems take for granted.

3 - OPTIONAL VoIP

Need Voice over IP? Multi-location integration? No problem; small business VoIP is here. VoIP-enabled TalkSwitch models handle both VoIP and the traditional telephone network. It's the best of both worlds in one easy-to-use phone system.

4 - REMOTE EXTENSIONS

Your work doesn't stop at the walls of your office. Neither does TalkSwitch. You can add your cell phones or any other telephones, anywhere, as remote extensions of your system. TalkSwitch uniquely connects your mobile and teleworkers.

5 - EASY SET-UP

Unlike other telephone systems, TalkSwitch is easy to install, saving you time and money; you can even do it yourself. And with its easily configured settings, moving employees or changing the way your phone system handles calls is a snap.

6 - FLEXIBLE GROWTH

TalkSwitch has a modular architecture that lets you grow when you need to and add VoIP when you want to. Designed to maintain your investment as you grow, TalkSwitch covers from 1-64 users per location.
